

“Apritevi a una nuova dimensione”

È solo il coraggio di credere nella forza e nella determinazione di operare scelte importanti, seppur difficili, che ci porta a realizzare un sogno: **Aprire una porta e guardare una nuova realtà!** Questo è il nostro leitmotiv.

“Open up too a new dimension”

*It's only the courage to believe in the strength and determination to make important choices, albeit difficult, which leads us to accomplish a dream: **To open a door and look at a new reality!** This is our leit-motif.*

L'impegno e la tenacia che ci hanno consentito di realizzare tutto ciò, sono state riconosciute oltre che dalla soddisfazione della nostra clientela anche dall'Università Sapienza di Roma con la quale è stato sottoscritto un protocollo d'intesa che pone l'azienda in una posizione di innovazione, per promuovere e favorire la valorizzazione delle risorse umane e culturali, sia interne aziendali, che nel territorio in cui opera. La CS Domus srl si propone anche l'impegno sociale promuovendo e favorendo iniziative di beneficenza contemplate nel bilancio sociale d'impresa.

The commitment and tenacity that have allowed us to achieve all that, have been recognized not only by our customers' satisfaction but also by La Sapienza University in Rome with which a memorandum of understanding was signed that puts the company in a position of innovation to promote and encourage the development of human and cultural resources, both inside the company and in the territory in which it operates. CS Domus offers a social commitment as well, by promoting and helping charitable initiatives from the company's social budget.

Partnership
SAPIENZA
UNIVERSITÀ DI ROMA

Dal classico al moderno, dal rustico al contemporaneo, CS Domus srl propone le migliori soluzioni per ogni tipo di arredamento con una gamma variegata di prodotti: porte in laminato, in finto massello, in tranciato, in listellare, in MDF. Porte intelaiate, pantografate, a libro e scorrevoli, laccate, stampate e bugnate. Possiamo fornire anche blindati e pannelli semilavorati.

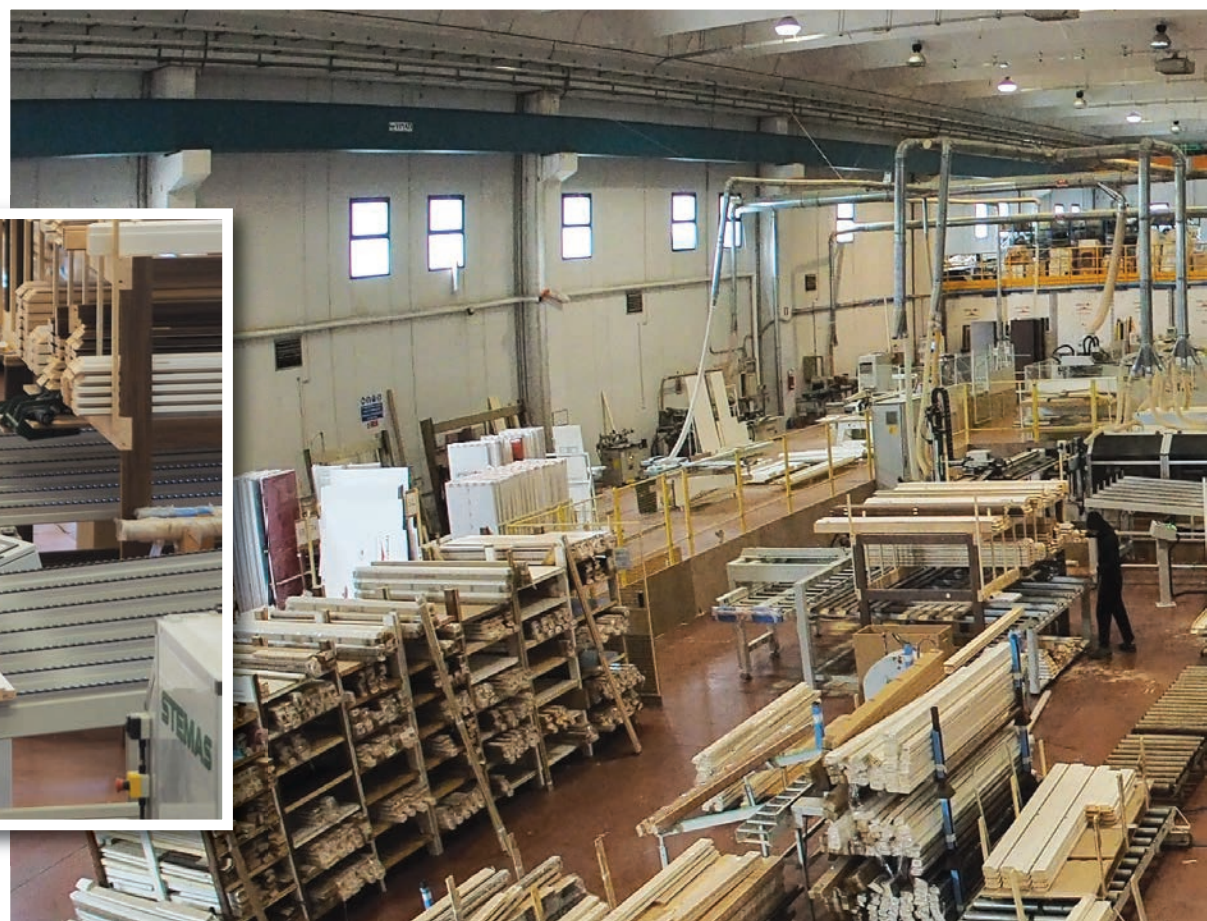

From classic to modern, from rustic to contemporary, CS Domus offers the best solutions for every type of furniture with a wide range of products: laminated doors, faux wood, wood veneer, blockboard, MDF. Framed doors, pantograph, folding and sliding, lacquered, moulded and rusticated doors. We can also supply security doors and semi-finished panels.

La CS Domus srl, dopo cinque anni di attività, si propone come un'azienda d'avanguardia capace di presentare alla clientela un prodotto che nonostante una lavorazione industriale, mantiene le qualità artigianali, avvalendosi della collaborazione di aziende serie e prestigiose. Crea con esse e con i propri clienti, un rapporto di partnership basato sulla fiducia e sulla professionalità. Ma ciò che la rende importante partner nel mercato è il notevole servizio che riesce a dare, grazie a innovative attrezzature e ad un team giovane e dinamico che assicura **la personalizzazione dei modelli e la consegna rapida e garantita.**

*CS Domus, after five years of activity, presents itself as a pioneering company capable of supplying its customers with a product that despite an industrial manufacturing process, still keeps the artisanal quality, thanks to the cooperation of serious and prestigious companies. CS Domus creates with them and with its own customers a partnership based on trust and professionalism. But what makes it an important partner in the market is the outstanding service that is able to give thanks to innovative equipment and to a young and dynamic team that ensures **the customization of all models and a rapid and guaranteed delivery!***

La porta è un'apertura che permette il passaggio da un ambiente ad un altro. Varie tipologie e forme di porta hanno caratterizzato gli edifici nella storia identificando e personalizzando l'ambiente con un determinato stile. Dalle antiche "Domus" romane alle nostre moderne abitazioni. Le porte sono essenziali alla finitura di un ambiente creando a volte un vero e proprio complemento di arredo caratterizzandosi come elementi di design.

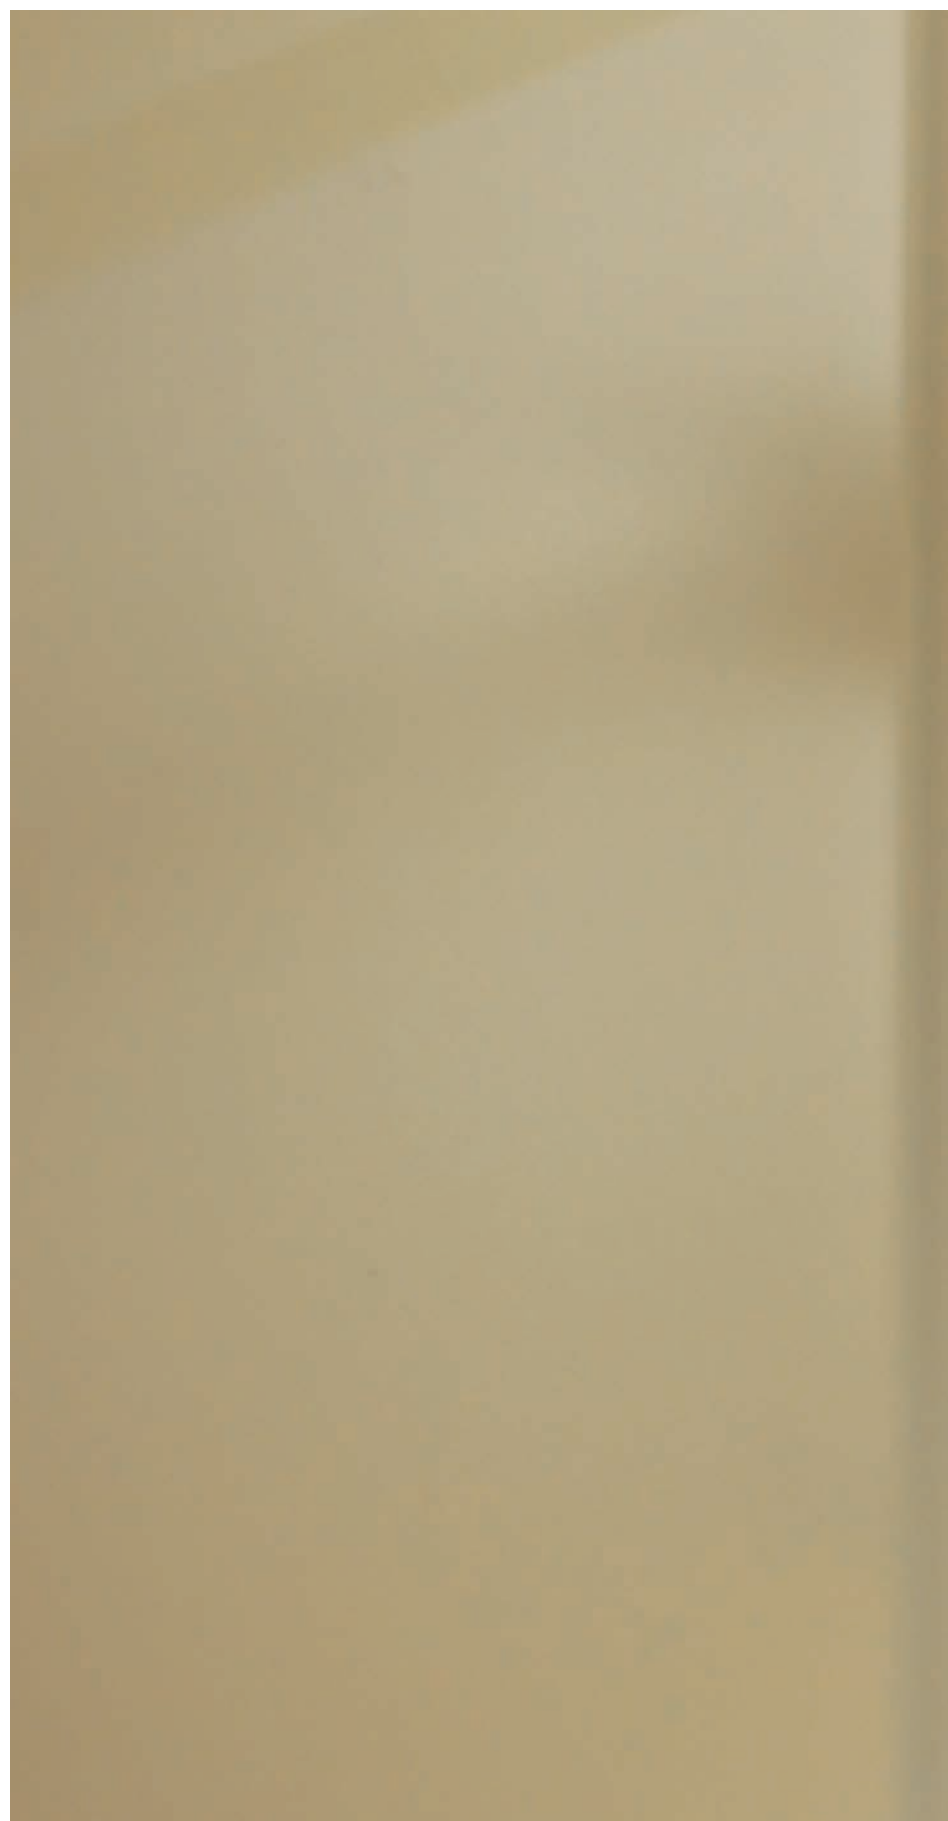

Non sono da sottovalutare inoltre gli utilizzi come elementi portanti per i giochi di luce in un ambiente. Nella progettazione le porte determinano le altezze degli elementi circostanti fornendo un valido spunto alle proporzioni degli ambienti, ad esempio in un ingresso o un salone una porta "relativamente" bassa circondata da elementi scalari offrirà un punto di prospettiva più lontano donando aria all'ambiente.

Il ventaglio di modelli è ampio, con infinite combinazioni, tra cui troverete sicuramente "la vostra". L'elemento comune è la mano di chi le lavora.

Apriamo le porte all'innovazione, affacciandoci a una nuova dimensione.

The door is an opening that allows the passage from one environment to another. Various types and shapes of doors have characterized buildings in history by identifying and customizing the environment with a certain style. From the ancient Roman "Domus" to our modern homes. Doors are essential to an environment, sometimes creating a true complement of furniture becoming elements of design. One should not underestimate their uses as players for games of light in an environment. In planning, doors do determine dimensions of the surrounding elements, providing a good starting point to the proportioning of all environments; for example in an entrance or in a hall a "relatively" low door surrounded by scaling elements will offer a farthest perspective point donating "volume" to the environment. There is a wide range of models, with endless combinations, amongst which you will certainly find "yours". The common element is the hand of the one who makes them.

Let us open the doors to innovation, reaching out to a new dimension.

14	Limitatore di apertura	Opening restrain	Entrebailleur				
15	Gancio limitatore di apertura	Safety Hook	Crochet de sûreté				

La presente rappresentazione grafica degli elementi che compongono il modello di porta blindata è da intendersi valido per porte con apertura standard a spingere (Dx - Sx). La scelta di un diverso senso di apertura comporta, infatti, degli adeguamenti tecnici della scocca. Per maggiori informazioni sul senso di apertura vedi pag.68. Per il supplemento prezzo vedi la tabella riportata a pag. 27.
